web-

web **System - Configuration - Reset to factory defaults**

The screenshot shows the VP-52CG web interface. The top navigation bar includes links for Information, Account, Configurations (which is highlighted with a red box), Upgrade, Auto Provision, and Tools. On the left, a sidebar lists System, Network, Line, Phone settings, Phonebook, Call logs, and Function Key. The main content area has sections for Export Configurations (with 'txt' and 'xml' options), Import Configurations (with a configuration file input field, Select button, and Import button), and Reset to factory defaults (with a red box around the link). Below the reset link, instructions say to click the [Reset] button to reset the phone to factory defaults, and a warning states 'ALL USER'S DATA WILL BE LOST AFTER RESET!'. There are checkboxes for Clear ETC File, Clear Contact, and Clear Call Records, followed by a large red box around the Reset button.
